Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6, 9, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Chao et al (US Pat. No 6,422,711) as furnished by applicants.

Regarding claims 1-13, the applicant is advised that claims have been given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974), Cao discloses a display substantially as claimed including: an optically opaque base (10, figs 4-5) comprising first and second surfaces, said optically opaque base comprising an aperture, said aperture defining an outer perimeter of a display element (element "O"), a rib (12, fig. 5) attached to said base and disposed within said aperture such that said rib is not coplanar (col. 2, lines 37-40) with said first and said second surfaces of said base, an optically opaque inner member defining an inner perimeter of said display element, said inner member disposed in said aperture to define a region (10, fig. 4) between said outer and inner perimeters of said display element, said inner member attached to said rib, and a light source (LED, col. 2, lines 30-32) disposed to project light toward said inner member and said base such that light passes through said region, further

Art Unit: 2875

comprising a diffusing material (20, fig. 6) disposed in at least a portion of said region, a diffusing film (30, fig. 6),

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, 8, 10-11, and 13-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chao in view of In re Dailey, 149 USPQ 47 (CCPA 1976).

Regarding claims 5, 7, 8, 10-11, and 13-19, Chao discloses the claimed invention as applied above except for shape variation of the rib. It has been held that a change of shape of a previously known apparatus would have been obvious to one of ordinary skill in the art. See In re Dailey, 149 USPQ 47 (CCPA 1976).
